

**PURE  
AND  
CLEAN**

**Virus  
Protection**

Provides cutting edge protection by killing the germs and viruses that can cause diseases.

**Bacterial & Mold  
Protection**

By removing all airborne bacteria, virus, and fungi hence it stops formation of related molds

**Allergy  
Protection**

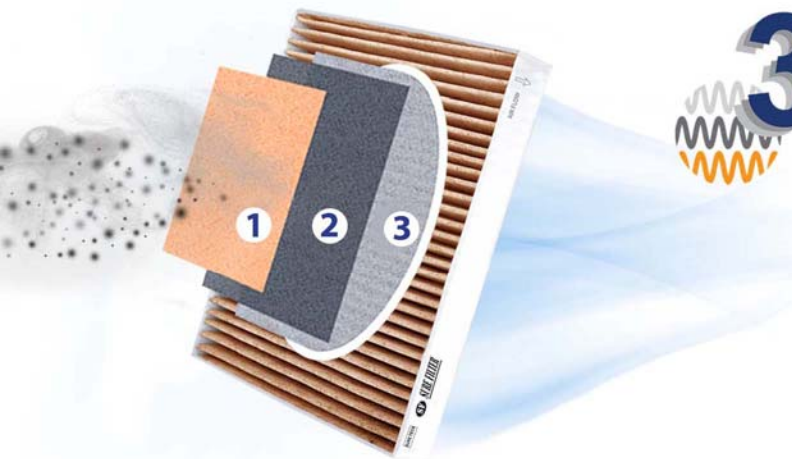

Eliminates allergens that can trigger hypersensitive reactions like asthma.

**3** Layers of Protection  
for *pure & clean air*

**Cabin Air Filter**

## Cabin Air Filter

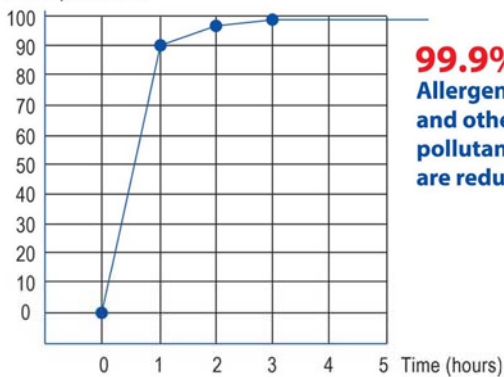

### 3 Layers of Protection for pure & clean air

1. Improves your health by stopping **viruses, allergens, bacteria** and **fungi**.
2. Improves your driving experience through the removal of odors and harmful exhaust gases.
3. Keeps the air in your car clean by eliminating dust and microscopic particles.

#### Anti-allergen test (allergen residual %)

Filtration of allergens and other pollutants %

**99.9% Allergens and other pollutants are reduced**

ELISA method High allergic pollen

Anti-bacteria, virus & mould Lab Tests according to JIS L-1902 (bacteria), ISO 18184 (virus), and JIS Z-2911 (fungus)

Under Laboratory Test

It shows relative effectiveness in reducing viruses, bacteria or fungi by **99.9%**

#### < 2.5 micron

Filters out dust particles up to 2.5 microns. This is 30 times smaller than the width of a hair.

#### Odor Absorber

Active carbon layer removes unpleasant odors and harmful gases.

#### Recommended replacement interval

To ensure best performance, please replace your filter every 10,000 miles or after one year from the date of installation. You may adjust replacement depending on specific the vehicle operates conditions.
