

SURE FILTER[®]

HEAVY DUTY

& AUTOMOTIVE FILTRATION PRODUCTS

"WHEN FILTRATION MATTERS"

SURE FILTER believes in and prides itself regarding its quality in order to ensure effective and efficient filtration solution.

Effective filtration involve many aspects of design in order to provide a wider yet more precise application. Efficient filtration must be delivered with an equal economic consideration.

Addressing this and finding an enigmatic balance, **SURE FILTER** combines the best elements of design, distribution, and world class manufacturing to offer a solution for all **"WHEN FILTRATION MATTERS"**

PRODUCT TYPE

SURE FILTER offers a complete type of products ranging from air filter, fuel filter, oil filter, hydraulic filter, HVAC to air purifier filter. These products are designed, built, and tested to ensure they provide the utmost performance and protection.

AIR FILTER

The Air Filter plays vital role by filtering contaminated air prior to the air entering the intake system and the engine. This ensures that only clean air (contaminant free air) is mixed with the fuel before entering the combustion chamber.

OIL FILTER

The Oil Filter plays a vital role in removing contaminants from the engine oil while still maintaining the required oil flow and pressure to the engine.

CABIN AIR FILTER

The Cabin Filter removes contaminants such as dust, pollen, and pollutants from the air entering the vehicle. A clean Cabin Filter may lead to improved overall health by stopping viruses, bacteria, allergens, and fungi (cabin air filter with anti-virus media type) from entering the vehicle.

FUEL FILTER

The Fuel filter removes fine contaminants from the fuel to ensure only clean and pure fuel is delivered to the engine. Clean fuel will prolong the life span of the fuel system and provide improved fuel efficiency.

HYDRAULIC FILTER

The Hydraulic Filter is designed to remove fine contaminants for the protection of the most vital components in the system.

COOLANT FILTER

The Coolant Filter helps maintain the proper balance to prevent over-concentration or under-concentration, which leads to corrosion, liner pitting and other system problems.

FUEL/WATER SEPARATOR

The Fuel/Water Separator removes water contamination to ensure only clean and pure fuel is delivered to the engine.

AIR/OIL SEPARATOR

In compressed air systems, the majority of the oil is removed by centrifugal force. The remaining amount, which consists of small droplets and mist, must be separated out by an air/oil separator.

PRODUCT TYPE (CONT.)

HVAC FILTER

Provides a comprehensive clean air solution for industrial and clean room, with the best quality and performance, ranging air cleaners to high efficiency filters.

AIR PURIFIER FILTER

Removes harmful particles (dust, odor, mold, bacteria, virus, etc.) up to 99,97% and keep your indoor environment clean and safe for you and your family.

LABORATORY TESTED

SURE FILTER products are designed & manufactured to ISO, JIS, DIN, and SAE standards to meet performance requirements for efficiency, pressure, vibration, and life span.

Triple Loop Multipass Test Stand

Cold & Heat Chamber

Air Tester Stand Machine

Cabin Air Filter Test System

WIDE RANGE APPLICATION

SURE FILTER covers a wide range of applications from passenger car, commercial, construction & mining, agricultural, marine, industrial, and home appliances.

KEY DIFFERENCES

SPIN-ON FILTER

STEEL TENSION SPRING

is manufactured with heat treatment process in order to maintain the element support to prevent by pass.

SURE FILTER PRODUCTS

are made to withstand intra-plastisol leakage.

THICKER BODY

for structural integrity.

HIGH PERFORMANCE MEDIA

with reinforced full synthetic and high efficiency media*, offers maximum engine protection and longer service life.

*for certain application and part number

SPIRAL PERFORATING TUBE

provides higher strength and better flow rate.

HEAVY EQUIPMENT BASE PLATE

provides superior structure support for maximum strength.

Supported by Clamp

ELEMENT FILTER

GASKET SEAL

Designed with air spring in the core to provide better sealing efficiency and prevent air bypass.

FILTRATION MEDIA

Media choice and pleating design to provide optimum performance and reduce pressure drop across media.

INNER & OUTER TUBE

Expanded inner and outer tube with clamping joint for maximum strength to support the filter media.

Air Spring
